

## How do I automatically register Driveve | Image on a device?

Knowledge base article #4648

### Prerequisites: Required device settings

For some device types certain device settings are required before you install Driveve | Image on the device:

- **Xerox**

- [Which settings are required on a Xerox device before installing Driveve | Image on the device?](#)

- **Kyocera**

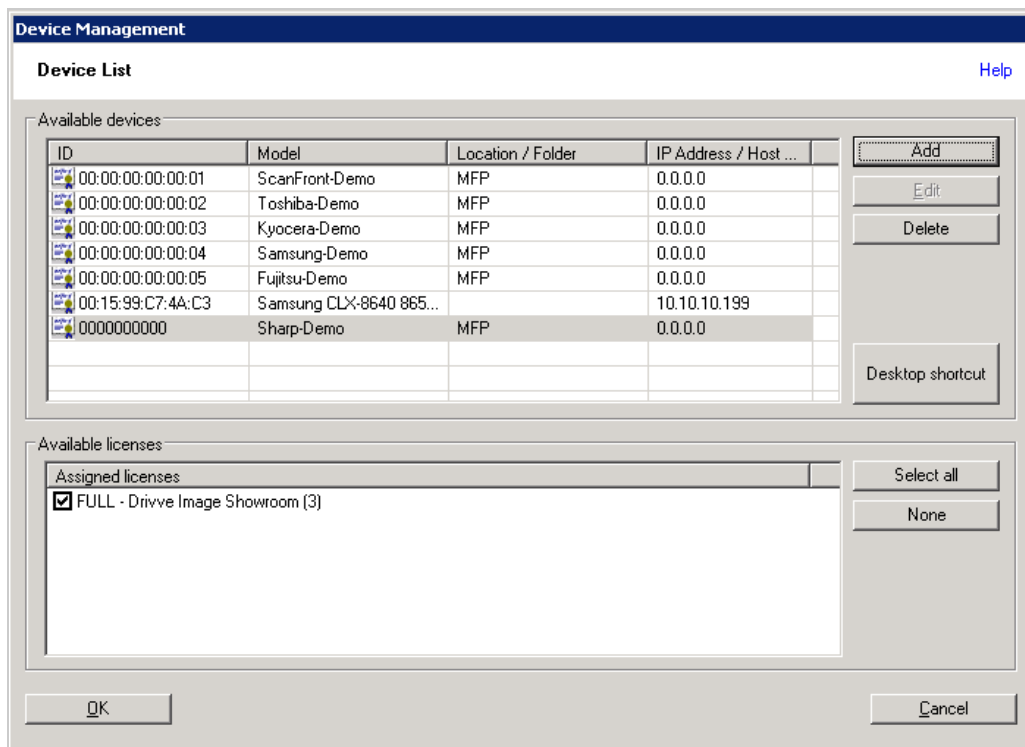

- [Which settings are required on a Kyocera device if I install Driveve | Image?](#)

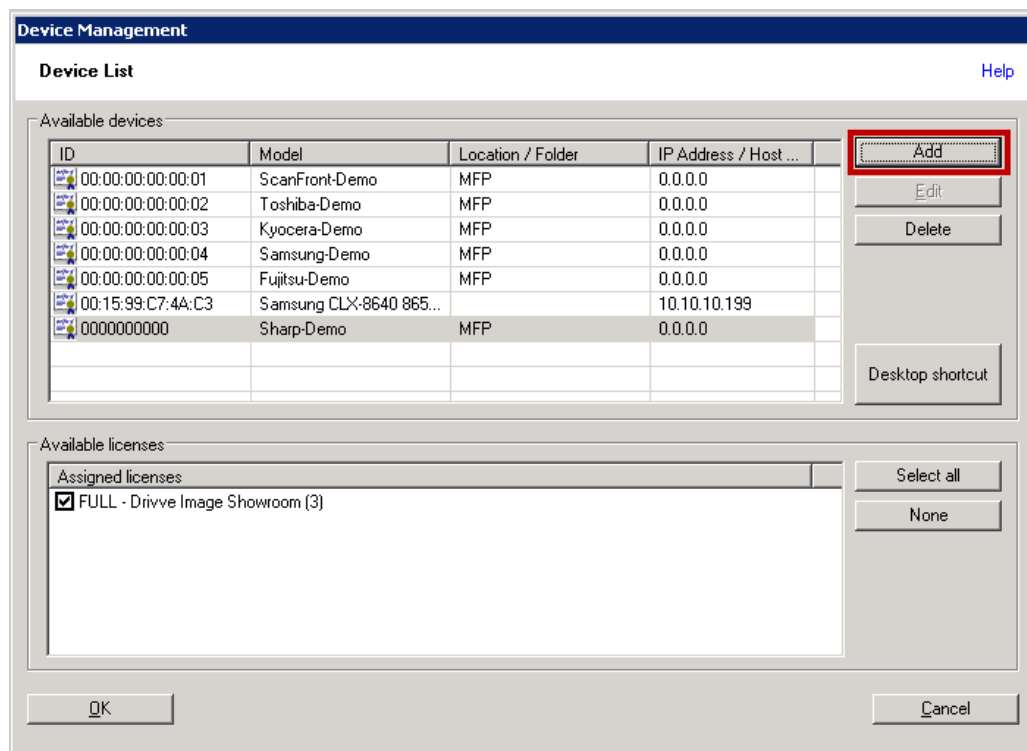

In order to select Driveve | Image profiles at the device display, the Driveve | Image application has to be registered on the device. The device has to be added to the Driveve | Image device management.

### Proceed as follows:

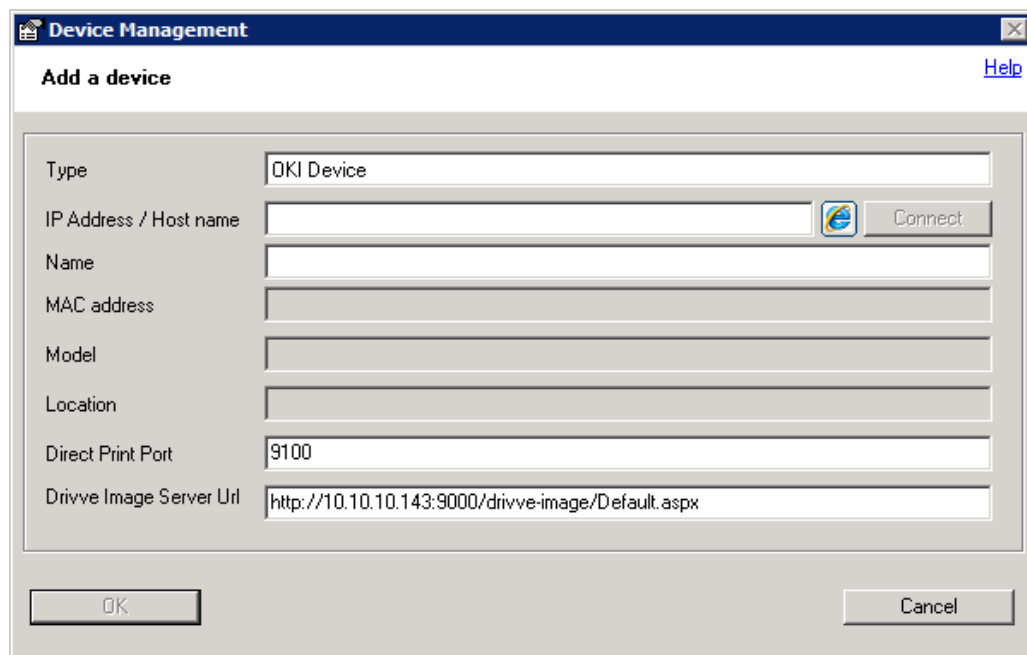

1. Start the Driveve | Image configuration program.
2. On the **Tools** menu, click **Device Management**.  
The dialog **Device List** is displayed.

3. Click the **Add** button.

The dialog **Add a device** is displayed.

4. In the field **IP Address / Host name**, enter the IP address or the host name of the device.

**Device Management**

**Add a device** [Help](#)

Type: OKI Device

IP Address / Host name:    [Connect](#)

Name: 10.10.10.198

MAC address:

Model:

Location:

Direct Print Port: 9100

Drive Image Server Url: http://10.10.10.143:9000/drive-image/Default.aspx

**Note: Generic Edition**

If you are using the Drive | Image Generic Edition, you have to select the manufacturer of the device in the **Type** field.

5. Click the **Connect** button.

**Device Management**

**Add a device** [Help](#)

Type: Samsung

IP Address / Host name: 10.10.10.198  Connect

Name:

Serial Number:

Model:

Location:

Direct Print Port: 9100

Drive Image Server Url: http://10.10.10.143:9000/DriveImageWS/DriveWS.aspx

Please enter the IP address of the device and click [Connect](#).

Drive | Image now tries to connect to the device. If this is possible, additional device information (for example MAC address and model) are automatically entered into the corresponding fields of the dialog **Add a device**.

**Note:** In some cases (e.g. some Lexmark eSF5 devices) more than one MAC address is returned. Make sure to select the correct MAC address. Usually this is the address shown on the device below the Ethernet settings.

---

AirPrint

Ethernet

Network Speed: 100 Mbps, Full Duplex

**Network Address**

UAA: 0021B70DC6DA

6. Configure the following settings:

- Tick the checkbox **Automatically register the Drive Image application on the device**.
- Enter the user name and the password - if available - into the fields **User** and **Password**.

### Optional settings

The following overview shows the available optional settings:

Setting	Details
Checkbox "Auto Login"	If Single Sign-on (SSO) is configured, enable the checkbox <b>Auto Login</b> . In this case, Drivve   Image checks whether the user entered matches the user in the LDAP directory. If this is the case, the user does not have to authenticate when he starts the Drivve   Image on the device display.
Field "ExitURL" (only available for OKI and Toshiba devices)	For OKI and Toshiba devices, the field <b>ExitURL</b> is displayed. In this field, you can enter an URL which is opened if you leave the Drivve   Image application at the device.
Checkbox "Application"	<p>If you do not wish to use Drivve   Image to be used as the application name displayed at the device display, you can choose another name:</p> <ul style="list-style-type: none"> <li>• Tick the checkbox <b>Application</b>.</li> <li>• Enter the required name into the field to the right of the checkbox <b>Application</b>.</li> </ul>

#### 7. Click **OK**.

The Drivve | Image application now is registered on the device. The dialog **Add a device** is closed. The newly registered device now appears in the list **Available devices** of the dialog **Device List**.

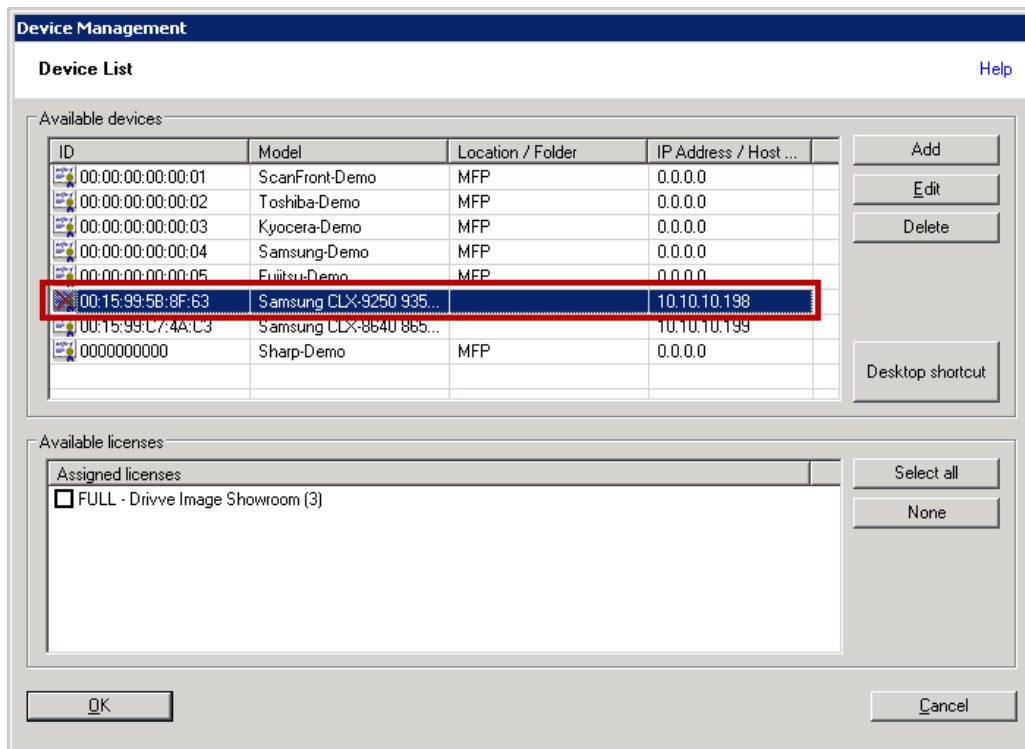

#### Manual registration

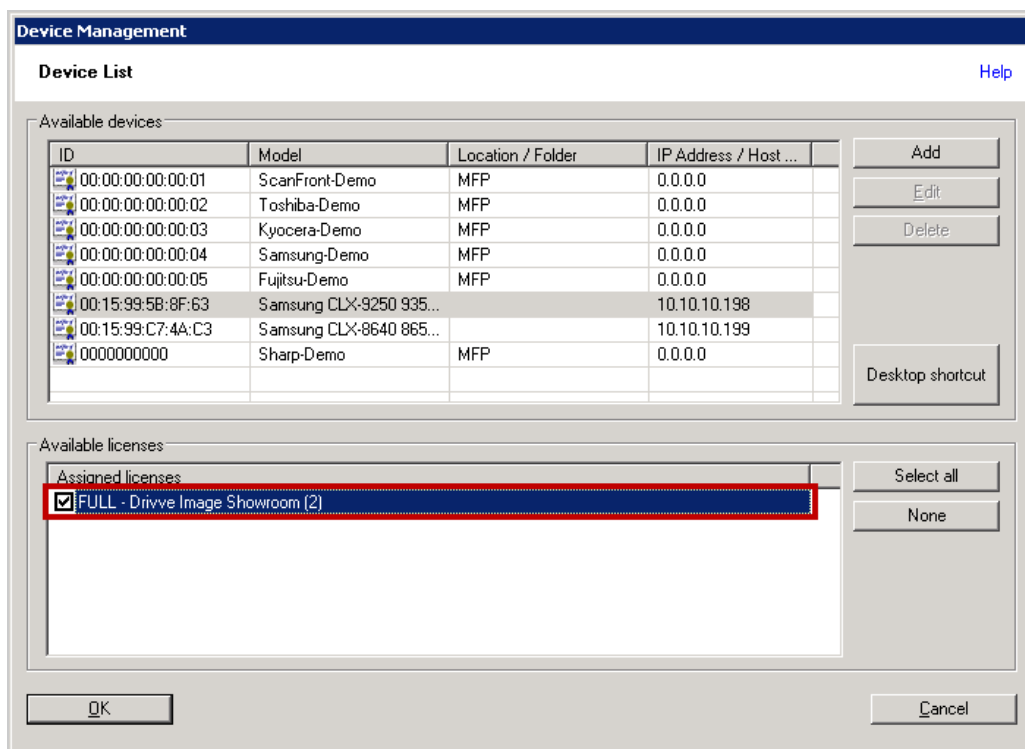

If the Drivve | Image application cannot be registered automatically, a corresponding message is displayed. Nevertheless, the device is added to the list **Available devices** in the dialog **Device List**.

Now, you have to assign a license to the device:

8. In the list **Available devices**, click the device.

9. Go to the list **Available licenses** and tick the checkbox of the license you want to assign.

10. Click **OK**.  
The Drive | Image application is now registered on the device.
