# System Requirements Drivve | DM version 10.x and higher

## Supported operating systems

Microsoft Windows Server 2016, 2019, 2022, 2025  64 Bit

Windows 10 Pro

Windows 11

## Supported browsers

Latest versions of the following browsers:

- Mozilla Firefox
- Google Chrome
- Microsoft Edge

## Further requirements

- Memory: 4 GB RAM (recommendation: 8 GB or more, especially if you are working with large documents)
- CPU: 4 cores
- Available storage space: min. 2 GB; correspondingly more for Drivve DM data base files
- The latest version of Microsoft .Net, minimum 4.8
- The Windows service LanmanServer (or sometimes called "Server") must be activated.

## Recommendations

Add additional cores if you experience the need to speed up the OCR or preview creation by the conversion service.
Add additional cores or RAM if other applications, that require CPU performance or RAM, do run on the same server.
